

REMOTE MONITORING SOLUTIONS FOR MANUFACTURING

Keeping production humming just got a whole lot easier.

Put an end to unnecessary downtime

As a manufacturing manager, you take ultimate responsibility for so many processes. With limited hours in the day, how do you find time to oversee it all?

Get real-time alerts for situations that require your attention.

Our sensors will let you know if motors are vibrating irregularly or excessively, temperatures are off, or humidity is high. With such a broad line of sensors, there are so many things you can monitor from one platform. Always know your production process is optimized with Wireless Sensors for remote facilities monitoring.

Easily set alerts for the thresholds you care about.

Simple online configuration allows you to choose the conditions that trigger alerts and which team members should receive them. You can have peace of mind wherever you have cell service—receive alerts via text, email or call. Never be caught off guard by facility emergencies again.

Access a dashboard for each of your devices.

Securely view readings from all your sensors online or via mobile app. You can even compare the readings for multiple facilities or multiple areas of the same facility. Basic monitoring and mobile apps are included (Android and iOS).
